Foreword

Since Québec's forest system was first adopted in December 1986, the ministère des Ressources naturelles, de la Faune et des Parcs (MRNFP) has taken a number of concrete steps to consolidate its shift towards sustainable forest management. For example, in 1996 it amended the **Forest Act** and the **Regulation respecting standards of forest management for forests in the public domain**, and it also adopted various measures to ensure the protection of forest biodiversity. This ongoing process is vitally important, because Québec's forests are evolving constantly.

With the amendment of the **Forest Act** in June 1996, Québec confirmed its commitment to the principle of sustainable forest development in order to meet the economic, environmental and social needs of present and future generations while giving proper consideration to the other potential uses of the forest. Public and private forests must now be managed in a way that preserves biological diversity, conserves soil and water resources, and maintains or improves the condition and productivity of forest ecosystems.

The **Regulation respecting standards of forest management for forests in the public domain** was also overhauled to enable the MRNFP to comply with the resolutions formulated in its **Forest Protection Strategy**. For example, the revised regulation, in force since May 1996, prohibits all forms of logging except cutting with protection of regeneration and soils (CPRS) and substantially reduces the size of single-block cutting areas. The new regulation will facilitate the environmental certification of Québec's forest products, which is vital to our industry.

The MRNFP has also published a report on Québec's forest biodiversity, in which it undertook to enhance knowledge of the forests, provide better protection for fragile and exceptional ecosystems, and continue to apply the **Forest Protection Strategy**. To meet these commitments, it is currently developing a new approach to the maintenance of biodiversity in forest landscapes. The next five-year report on the state of Québec's forests will provide an update on the progress made in each of these areas.

The MRNFP has recently taken another crucial step in the development of its methods, with its review of the current forest system (Bill 136, An **Act to amend the Forest Act and other legislative provisions**, was adopted by the National Assembly on May 21, 2001). The proposed amendments were formulated following extensive public consultations and reflect the contributions of all players with an interest in sound forest management. The Act substantially improves forestry practices by addressing two components of forestry policy for which improvements had been promised, namely public participation and cooperation between different users of the forests.

Furthermore, in keeping with its mission, the MRNFP continues to make different tools available to anyone interested in the forests, including this document. As in past years, the 2003 edition of **Québec's Forest Resources and Industry** contains a **succinct statistical report** on Québec's forest sector. However, this year we have made some minor changes to the content. For example, we added a new chapter dealing with the use of non-timber matter, i.e. non-timber forest products (NFTP), and the survey chapter data are drawn exclusively from the third ten-year forest survey (except for the Magdalen Islands data, which are drawn from the second survey).

The full version of **Québec's Forest Resources and Industry** is available in French only, in **PDF** and **Excel** formats on the MRN's website at : <http://www.mrnfp.gouv.qc.ca/forets/connaissances/connaissances-statistiques.jsp>¹. To facilitate research, French-language and English-language summaries, containing the highlights of each chapter along with the principal maps and tables, are also available on the same website.

We hope you find this year's report as useful as past editions and, as always, we welcome your comments.

1. The full version is updated regularly, and we invite you to obtain the most recent data by consulting it on a regular basis.

Note to readers

The full version of this document (in French only) can be obtained from the website of the Ministère des Ressources naturelles, de la Faune et des Parcs (www.mrnf.gouv.qc.ca) by clicking on the **Forêts, Connaissances forestières et environnementales** and **Statistiques forestières** tabs, and then selecting **Complète**. In the Excel version, the tabs appearing at the bottom of the screen provide access to the various sheets.

Readers wishing to use the data contained in this publication should bear in mind the changes made to some of the tables illustrating statistical trends. An attempt to compare this year's tables with those of previous years may be difficult and lead only to confusion. In the Excel version, some data may appear to be cut off, due to on-screen column widths. To remedy this problem, use the PDF version or simply print the file instead of consulting it on screen.

For further information, please contact the author, Blaise Parent, at (418) 627-8644, extension 4112.

Symbols Used in the Tables and Diagrams

.. : Data not available

... : Data not shown

p : Provisional data

r : Revised data

e : Estimate

x : Confidential

Symbols used

bd ft: board foot

BDMT: bone-dry metric ton

cm : centimetre

cm³ : cubic centimetre

dm³ : cubic decimetre

FSPL : fir, spruce, jack pine, larch

G : billion

ha : hectare

hl : hectolitre

kg : kilogram

km : kilometre

km² : square kilometre

L : litre

lb : pound

m : metre

m² : square metre

m³ : cubic metre

M : million

mt : Metric ton

NAICS : North American Industry Classification System (Statistics Canada's new 2000 structure)

n.e.s. : not elsewhere specified

ngrv : nominal gross raw volume

no. : number

sq.ft. : square foot

t : ton

" : inch

% : percent

\$: dollar

DM : Deutsche mark

£ : pound sterling

¥ : Yen

Conversion factors

1 cord of wood = 85 solid cubic feet = 2.41 cubic metres

1 cunit = 100 solid cubic feet = 2.831 cubic metres

1 board foot (bd ft) = a piece of wood 1 inch thick by 1 foot wide by 1 foot long

1 000 board feet (bd ft) = 2.36 cubic metres (net value)

1 cubic metre = 423.7 bd ft = 35.3 cubic feet = 0.353 cunits = 1.5 stacked cubic metres

1 metric ton (long ton) = 1 000 kilograms = 2 205 pounds

1 Imperial ton (short ton) = 2 000 pounds

1 square kilometre = 100 hectares = 0.386 square miles

1 hectare = 2.47 acres

N.B.: In the full version of the text, each table, chart and map has been assigned a reference code, which is indicated in the upper right-hand corner. The first two figures of the code correspond to the chapter, the next two to the section and the last two to illustration. For example, code 02.01.03 designates the third illustration of the first section of chapter 2. The codes in the summary version are the same as those in the full version, so that readers can locate the different elements easily in the original document. As a result, the numbering is not sequential.

GLOSSARY OF THE MAIN ECONOMIC TERMS USED IN THE TEXT

Establishment

The smallest operating unit, generally a mill or factory, able to provide data on its inputs, outputs and activities for calculation of added value.

Total jobs

Positions related to production or to non-manufacturing activities in an establishment (cafeteria, head office, administration or sales). Also includes jobs generated by new construction, repairs or major alterations. Ownership and active partnership positions, which are not considered as salaried positions, are not included in the total jobs figure.

Total salaries and wages

Amounts allocated for compensation of all the salaried and non-salaried employees of an organization.

Value of shipments and other income

Value of shipments of company-specific products plus income obtained from non-manufacturing activities such as the sale of goods purchased and resold without processing, the book value of construction and capital work carried out by the establishment's personnel, for its own use, the cafeteria, etc.

Value added to total activity

Value added in the manufacturing activity, plus added value from non-manufacturing activities. This latter figure is obtained by subtracting from gross non-manufacturing production all purchases of goods for resale without processing (taking into account the net stocks variable for those goods), purchases of materials and supplies used in new construction or the production of machinery and tools for use by the establishment, and office supplies purchased and used by the establishment in a non-manufacturing activity.

Capital Expenditures

Capital expenditures include the cost of acquiring, constructing and installing plant, materials and sustainable tools, whether for replacement or rental.

Maintenance and repairs

Amounts paid to maintain works, materials and tools in good condition. They are not considered to be capital expenditures and are indicated separately.

GLOSSARY OF THE MAIN ECONOMIC TERMS USED IN THE TEXT (CONT'D)

Constant dollars

Dollars in a reference year used as a basis for converting dollars from other years, to eliminate the impact of fluctuations in purchasing power. The conversion is made using a price index.

Balance of trade

The difference between the monetary value of exports and imports of merchandise, goods and services. If a country exports more than it imports, its balance of trade is positive. If it imports more than it exports, its balance of trade is negative.

National exports

Products grown, extracted or manufactured in Canada and sold to other countries, including products from foreign sources that are processed in Canada.

Shipment

Shipment of merchandise (goods) to a domestic or foreign destination.

Imports

All merchandise introduced into a country, whether for immediate consumption or storage.

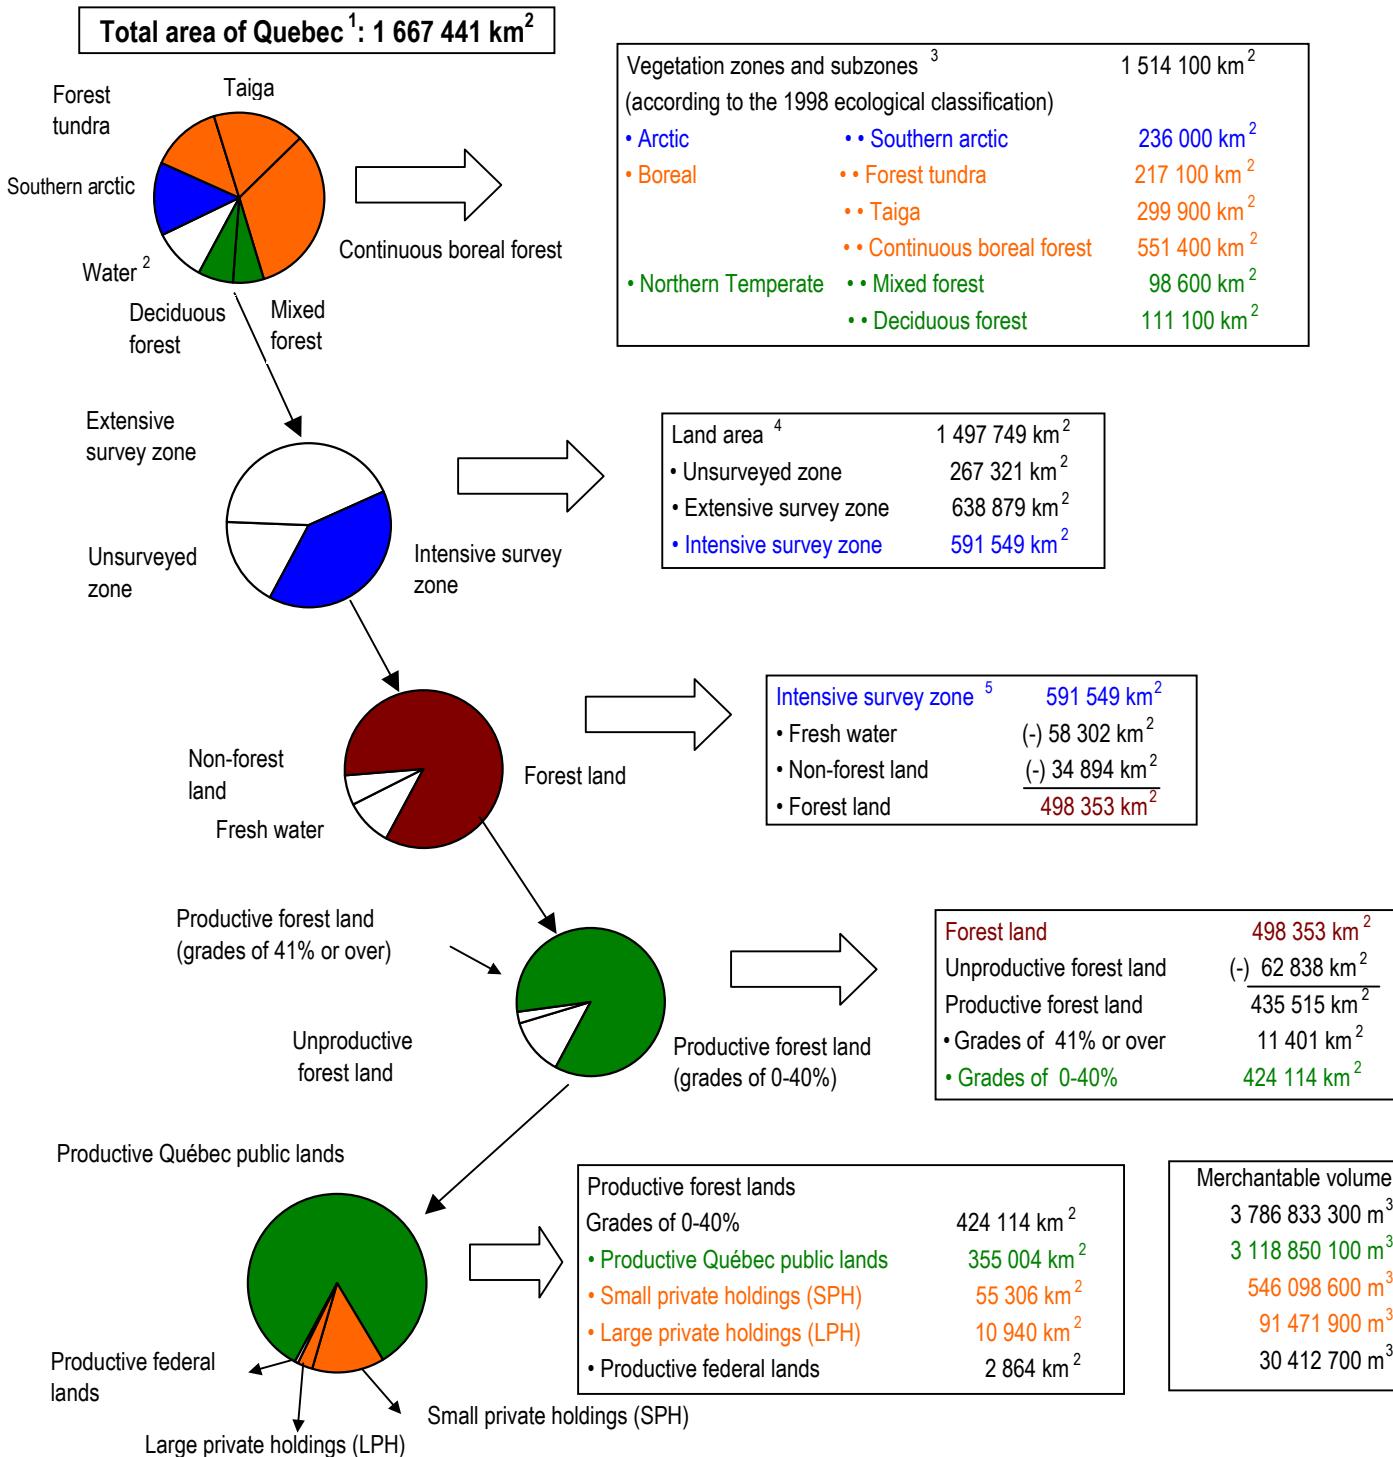

Selling price index

An index showing variations in the general rate of inflation or price variations in a given economic sector, compared with a reference year to which a value of 100 is assigned.

Gross domestic product (GDP)

The value of all final goods and services produced in a given period within the geographical boundaries of a country or territory.

Summary

1. Area obtained from a compilation of Québec border data to a scale 1:20 000, calculated using the Modified Transverse Mercator (MTM) system and the NAD83 geodesic reference system. Excludes Labrador, in accordance with the 1927 (non-definitive) boundary.

2. Includes the waters of the St. Lawrence River downstream of the eastern point of Orleans Island, the Gulf of St. Lawrence up to the 1964 boundary with the Maritime provinces; also includes James Bay, Hudson Bay, Ungava Bay and Hudson Strait (153 313 km²)

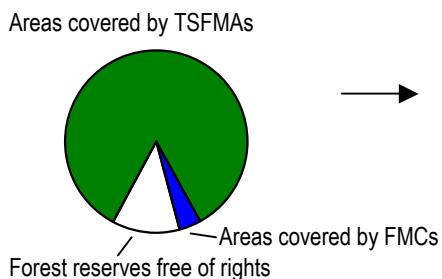

3. The limits of the bioclimatic domains have been revised by the Comité sur la carte des régions écologiques. The committee also established the new ecological land classification system in 1998 (includes inland waters but excludes the waters of the St. Lawrence River downstream of the eastern point of Orleans Island). The figures have been rounded off, possibly creating minor errors in the totals.

4. Updated August 2003: The original territorial data are drawn from the third ten-year forest survey (except the Magdalen Islands, for which data are drawn from the second forest survey). This area also includes inland waters but excludes the waters of the St. Lawrence River.

5. Lands whose forests can be developed over 120 years, in keeping with the principle of sustained yield.

Summary (cont'd)

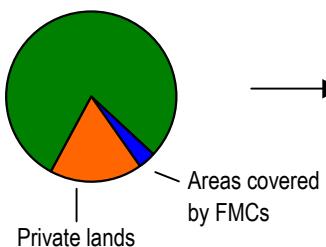

Distribution of productive Québec public lands

Productive Québec public lands (grades of 0-40%)	355 004 km ²
• Areas covered by timber supply and forest management agreements (TSFMA) (March 31, 2002)	299 162 km ²
• Areas covered by forest management contracts (FMCs) (March 31, 2002)	13 040 km ²
• Forest reserves free of rights and areas where forest production is prohibited (RSFM ¹ , parks, etc.)	42 802 km ²

Surface areas taken into account in calculating the allowable annual cut (march 31, 2002)

Areas covered by TSFMA

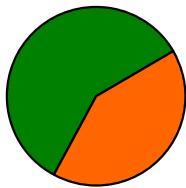

Québec public lands on which rights have been granted	299 162 km ²
• TSFMA	13 040 km ²
• FMC	66 246 km ²

Productive private lands taken into account in calculating allowable annual cut (grades of 0-40%)
PH : 55 306 km², LPH : 10 940 km²

Allowable annual cut (march 31, 2002)

Allowable annual cut in public forests

Allowable annual cut in private forests

Allowable annual cut - public forests

Private forests		8 342 011	8 198 368
Exchanges between mills		23 439 309	24 593 780
Outside Québec		7 169 765	7 534 552

Summary (cont'd)

The forest sector in Québec's economy (1999)

	Total Jobs (no.)	Total salaries and wages (\$, 000s)	Value of shipments and other revenue (\$, 000s)	Value added to total activity ¹ (\$, 000s)	Capital expenditures and repairs (\$, 000s)
Forest operations (NAICS 113)	11 120	255 540	2 258 181	712 556	184 900
Manufacturing of wood products (NAICS 321)	43 827	1 274 378	8 416 296	3 559 714	603 800
Paper manufacturing (NAICS 322)	34 455	1 765 225	11 337 796	5 041 509	1 283 900
Total	89 402	3 295 143	22 012 273	9 313 779	2 072 600

1. Including purchase of services.

Logging industry (2002)

Number of primary processing plants, including 1 200 sawmills	1 293
Number of pulp, paper and cardboard mills, 38 of which are included under primary processing plants	64

Forest product production

	2001	2002
Lumber (m ³ , 000s)	19 018	18 177
Joint sawmill production (BDMT, 000s)	12 260p	12 506p
Chips	7 424p	7 546p
Sawdust and shavings	2 039p	2 128p
Bark	2 797p	2 832p
Pulp and paper production (BDMT, 000s)	9 613	10 032
Newsprint	3 558	3 726
Cardboard and paper other than newsprint	4 698	4 841
Market pulp	1 357	1 465

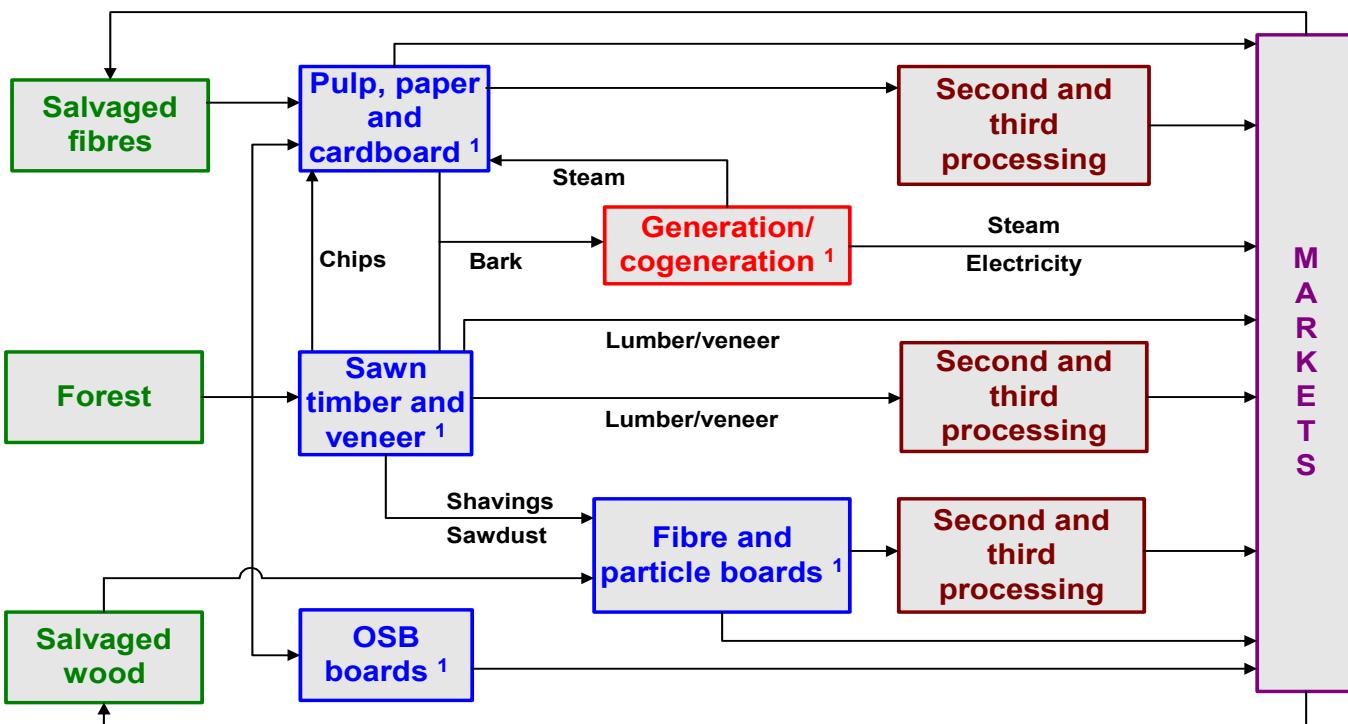

Québec's balance of trade¹ in the forest products sector (\$, millions)²

	2001	2002
Wood, charcoal and wooden products	3 346	3 154
Pulp, paper and cardboard	7 035	6 309
Total	10 381	9 463

1. Based on customs data, according to the Standard Classification of Goods (SCG).

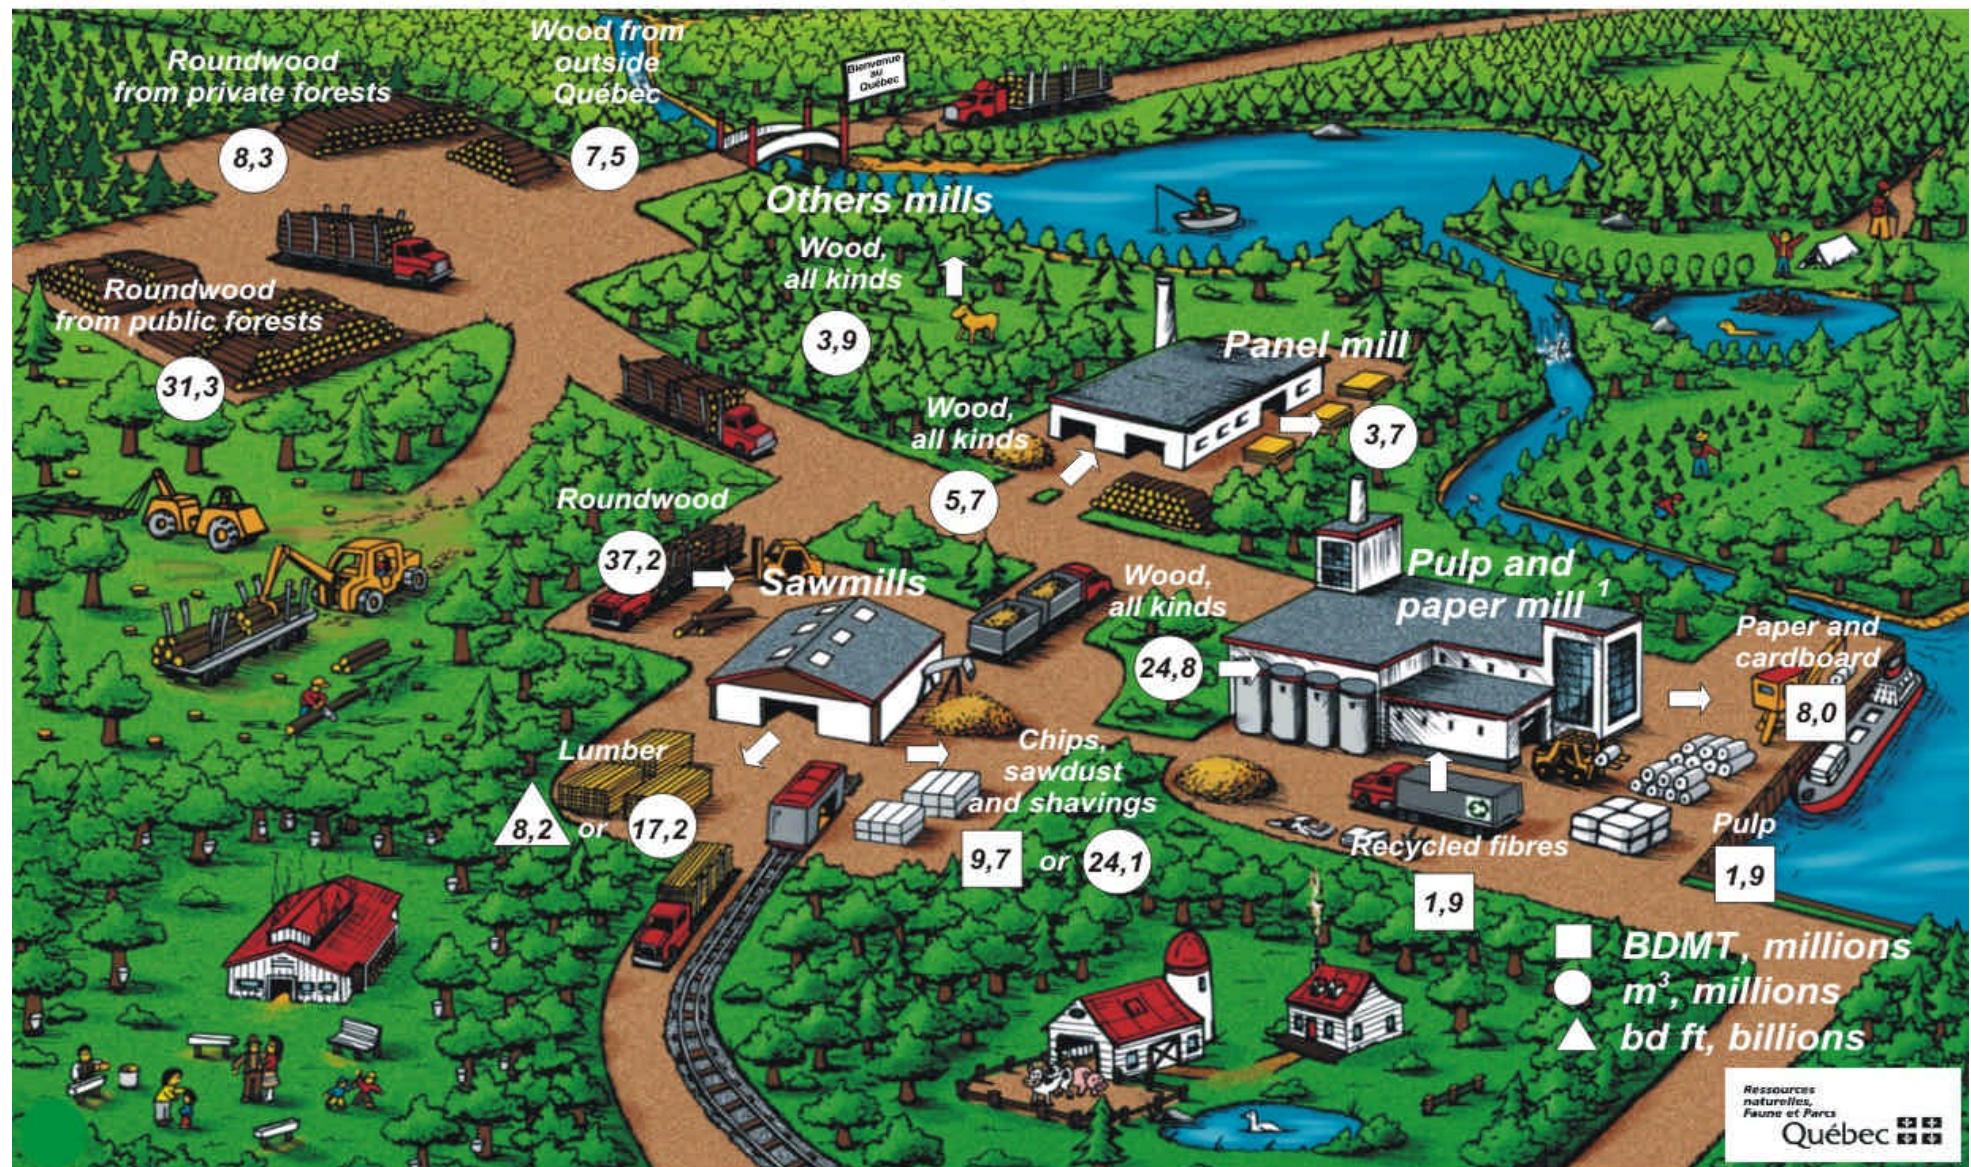

2. Product designation according to the World Custom Organization's harmonized Commodity Description and Coding System.

Integration of the forest products industry

1. Primary processing.

Supplies for Québec's primary wood processing industry (2002)

1. Including data from the 2002 annual survey.

Supplies for Québec's primary wood processing industry (2002)

Highlights

01.00.01

Total area of Québec

	(km ²)
Total area	1 667 441r
Land area ¹	1 497 749
Vegetation zones (according to the 1998 ecological classification) ²	
• Arctic	236 000r
• Boreal	1 068 400r
• Northern Temperate	209 700r

Types of ownership

	(km ²)
Public lands (Québec)	1 372 017
Private lands	116 398
Federal lands	9 334

1. Updated in August 2003: The original territorial data are drawn from the third ten-year forest survey (except for the Magdalen Islands data, which are still drawn from the second survey). This area also includes inland waters but excludes the waters of the St. Lawrence River.

2. The bioclimatic domain boundaries have been reviewed by the Comité sur la carte des régions écologiques, which also established the new ecological classification system in 1998 (including inland water but excluding the waters of the St. Lawrence River downstream of the eastern point of the Orleans island).

Public land use planning

	(km ²)
Public lands ¹	1 373 490
• Forest production prohibited	65 552
• Forest production allowed	86 830
• Forest production has priority :	367 856
- Forest and leisure area	6 650
- Forest production area	361 206
• Other resource production ²	853 252

- The areas were established from data gathered in 1997, and differ slightly from the areas measured during forest surveys. In particular, they have not been adjusted to reflect the latest modifications, including those resulting from sales of land, for example. Harmonization should be completed by 2003.
- Area with mining sites, energy development sites, etc., north of the common area boundary.

Administration of public forests, (march 31, 2002)

1. Not including areas covered by the waters of the St. Lawrence River and Gulf, James Bay, Hudson Bay, Ungava Bay and the Hudson Strait.

2. Updated August 2003: The original territorial data are drawn from the third ten-year forest survey (except for the Magdalen Island data, which are still drawn from the second survey).

This area also includes inland waters but excludes the waters of the St. Lawrence River.

3. The summary of surveyed forests in Chapter 2 covers the intensive survey zone only, since forest ecosystems in the extensive survey zone are so fragile that timber harvesting is prohibited.

4. Land supporting forest stands.

5. Forest stations, experimental and research forests, etc.

6. More than 800 hectares in a single block.

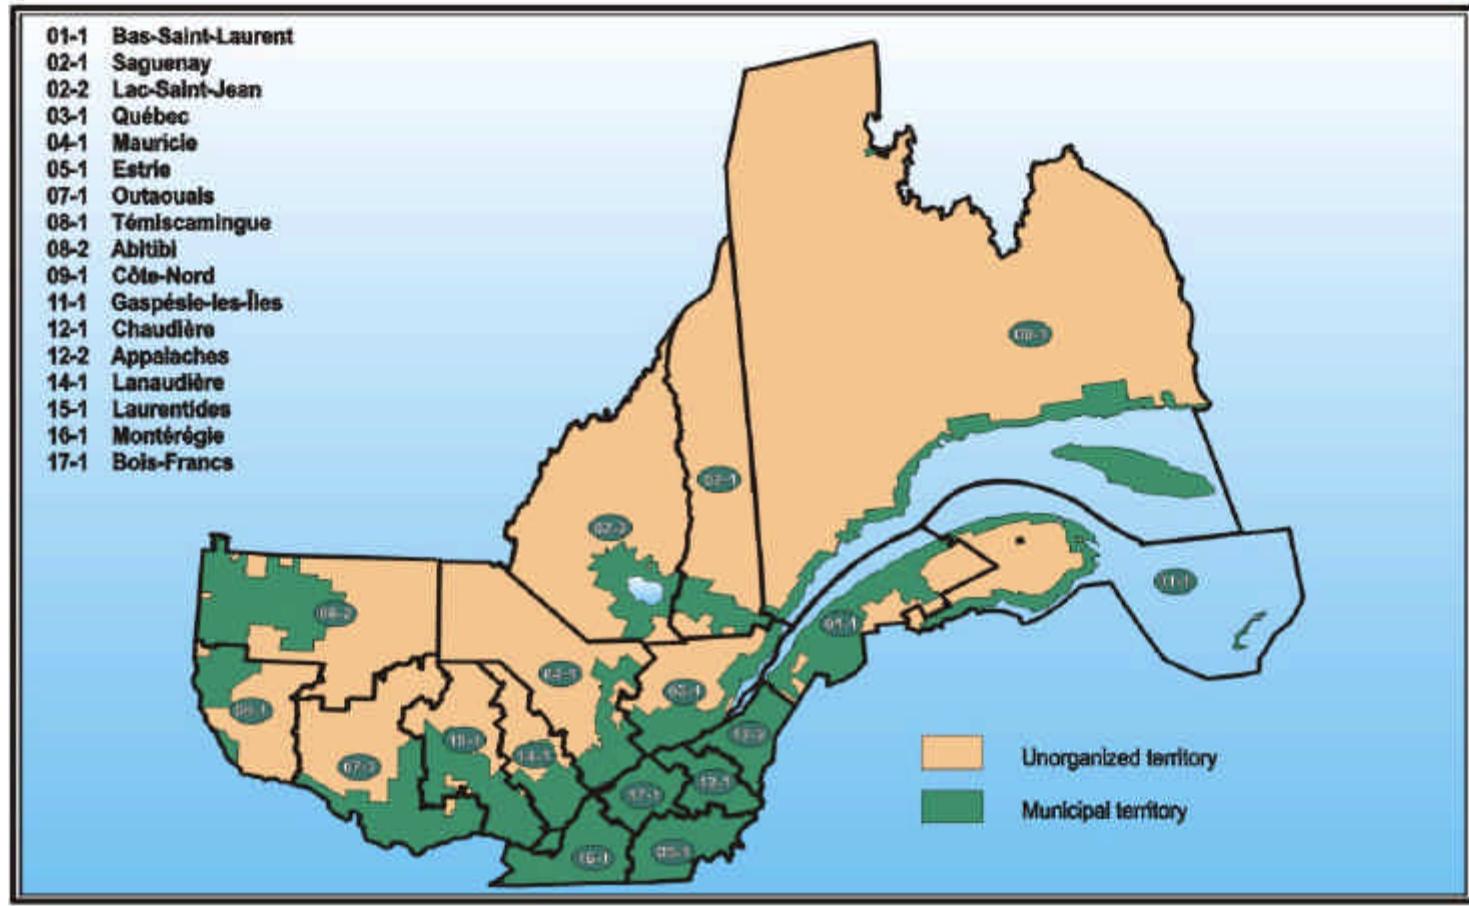

N.B.: Figures have been rounded off, which may have caused negligible errors in the totals.

1 Geographical distribution of Québec's forests

Private forests

Regional agencies for private forest development¹

01.07.01

1. Updated April 2002.

Regional agencies

No.	Administrative regions	Name of agency	Number of owners ¹	Active owners (%) ²
01-1	Bas-Saint-Laurent	Agence régionale de mise en valeur des forêts privées du Bas-Saint-Laurent	10 600	61
02-1	Saguenay	Agence régionale de mise en valeur des forêts privées du Saguenay	2 400	40
02-2	Lac-Saint-Jean	Agence régionale de mise en valeur des forêts privées du Lac-Saint-Jean	3 600	40
03-1	Québec	Agence des forêts privées de Québec 03 (AFPO)	6 500	85

3 Forest protection in Québec

Highlights

03.00.01

Area disturbed by the spruce budworm (ha, 000s)

	2000	2001 ¹
Light defoliation	2.7	0.7
Moderate defoliation	1.8	2.5
Severe defoliation	6.2	15.7
TOTAL AREA DISTURBED	10.7	18.9

1. Preliminary figures.

Areas disturbed by the hemlock looper (ha, 000s)

	2000	2001 ¹
Light defoliation	45.4	
Moderate defoliation	103.8	0.9
Severe defoliation	775.8	62.6
TOTAL AREA DISTURBED	925.0	63.5

1. Preliminary figures.

Forest fires

	2000	2001 ¹
Intensive protection zone		
• Fires (no.)	475	970
• Area disturbed (ha, 000s)	0.8	1.4
• Fire control and firefighting costs (\$, millions)	52.9	60.9
• Relative importance of fires caused by lightning ² (%)		
- Number		30
- Area disturbed		74
Limited protection zone		
• Fires (no.)	41	33
• Area disturbed (ha, 000s)	38.4	31.7
• Fire control and firefighting costs (\$, millions)	0.7	1.1

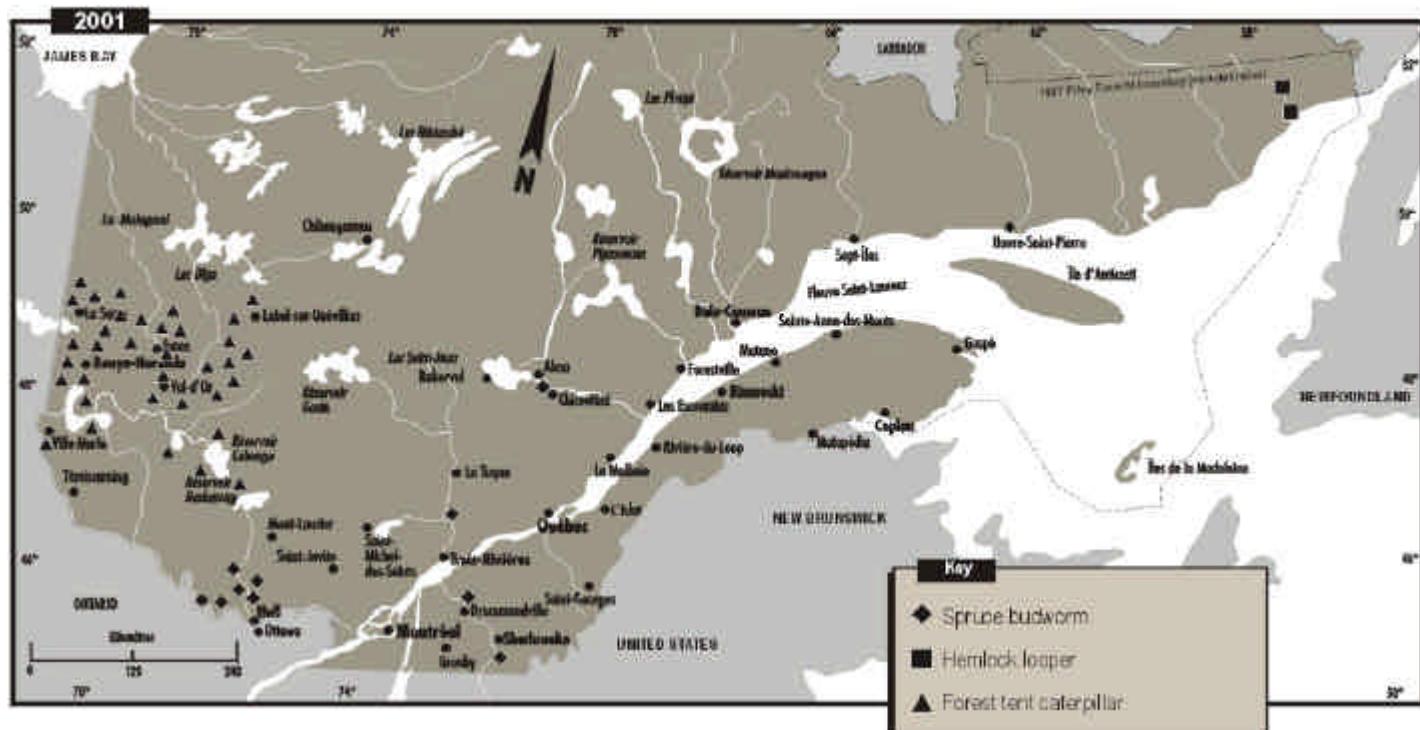

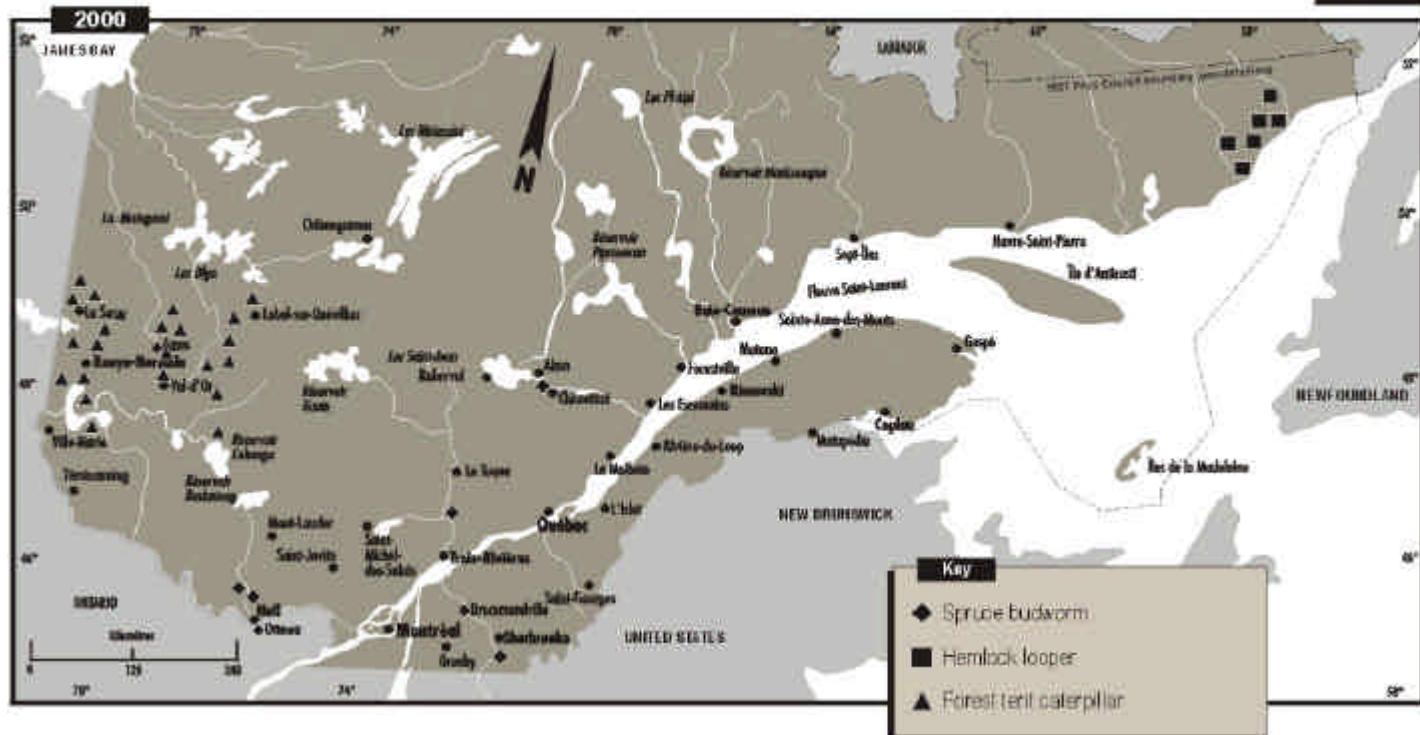

1. Lightning was the main cause of forest fires in Québec during the period 1992-2001.

4 Sustainable development of Québec's forests

Highlights

Sustainable development criteria

04.00.01

- 1 - Preservation of biological diversity
- 2 - Maintenance and improvement of the conditions and productivity of forest ecosystems
- 3 - Conservation of soil and water resources
- 4 - Maintenance of the function of forest ecosystems as a component of global ecological cycles
- 5 - Maintenance of the multiple socio-economic benefits society derives from the forests
- 6 - Giving of proper consideration, in selecting forms of development, to the values and needs expressed by the populations concerned

Distribution of protected areas by bioclimatic domain

(km²)

Sugar maple-bitternut hickory domain	296
Sugar maple-basswood domain	884
Sugar maple-yellow birch domain	2 718
Balsam fir-yellow birch domain	1 728

Spruce-moss domain	989
Forest tundra domain	14 548
Shrub arctic tundra domain	12 252
Waters of the St. Lawrence River, James Bay, Hudson Bay, Ungava Bay and Hudson Strait	2 954
TOTAL	49 021
Protected Areas in Quebec in March 2003¹	88 586

1. A protected area reserve of 40,050 km² was created between May 2002 and the end of February 2003.

Plant species designated as threatened or vulnerable

Wild leek
Adam-and-Eve
Jack-in-the-pulpit
Alpine fern
Hop sedge
Autumn coral-root, Pringle Corallorrhiza variety
Conrad corema
Ram's Head Lady's Slipper
Dwarf huckleberry, Bigelow variety
American ginseng
Spread-leaved sunflower

Animal species likely to be designated as threatened or vulnerable

Fish	5
Amphibians	5
Reptiles	7
Birds	12

1. Volume of timber harvested and actually measured in public forests, not including small volumes harvested for specific purposes (public utility works, mining activities, wildlife and leisure developments, etc.).

2. Estimated volume harvested in private forests by individual producers or producers' groups, including chips and firewood (approx. 2 million m^3), but excluding small volumes of roundwood harvested for export.

5 Forest management

Harvest (cont'd)

1. 1st period from April 1 to June 30; 2nd period from July 1 to September 30; 3rd period from October 1 to December 31; 4th period from January 1 to March 31.

2. The letters A, B, C and D correspond to the quality assigned during wood grading based on species, diameter, length and imperfections observed on the trunk and crosscuts

3. Since 1997-1998, mean unit rates have been estimated from the volume of timber harvested in each tariff zone during the previous year, for all species groups except FSPL

6 Use of forests for educational, leisure, research and experimental purposes

Highlights

Teaching and research forests (March 2003)

06.00.01

Teaching and research forests (no.)	16
Area (ha, 000s)	38.7

Note : The Duchesnay Forest Station is now under the responsibility of SEPAQ (Société des établissements de plein air du Québec)

Experimental forests (March 2003)

Permanent (no.)	211
Temporary (no.)	428
TOTAL (no.)	639
Area (ha, 000s)	26.3

7 Logging Highlights

Economic indicators for the Québec logging industry (NIACS 113)

07.00.01

	1999	2000
Total jobs (no.)	11 120	11 748e
Total salaries and wages (\$, 000s)	255 540	291 300e
Value of shipments and other revenue (\$, 000s)	2 258 181	..
Value added ¹ to total activity (\$, 000s)	712 566	798 000e
Capital expenditures and repairs (\$, 000s)	184 900	237 700e

1. Added value includes purchase of services.

8 Non-timber use

Non-timber forest products (NTFPs)

Highlights

Principal wildlife-related activities in 1999¹

08.00.01

	Participants (no.)	Expenditures (\$M)	Jobs (no.)	Added value (\$M)
Fishing	1 042 200	1 331.1	9 108	414.8
Hunting	403 600	298.2	3 210	152.0
Outdoor activities	2 325 300	1 227.4	15 127	677.8
Wildlife-related travel	1 198 800	293.4	3 265	157.2

1. In 1999, nearly 60% of Québec's population (3.6 million people) practised one or more activities directly related to nature.

Volume and value of large-container maple production, farm sales and home consumption

	2001	2002	
Bulk syrup	(l, 000s)	17 813r	20 933p
	(\$, 000s)	103 821r	117 639p
Direct sales by producers	(l, 000s)	3 310r	3 363p
	(\$, 000s)	27 129r	27 146p
Producers' consumption	(l, 000s)	281r	281p
	(\$, 000s)	2 307r	2 271p
TOTAL PRODUCTION	(l, 000s)	21 404r	24 577p
	(\$, 000s)	133 257r	147 056p
