The map module is displayed in a new window. Depending on the workstation, it can occur that the new window doesn't show up. The reason might be that the level of security of Internet Explorer is too high and/or the pop-up blocker is active on your system.

There are two solutions to that problem:

1) If you get a message like this one

 Une fenêtre publicitaire intempestive a été bloquée. Pour afficher cette fenêtre publicitaire intempestive ou des options supplémentaires, cliquez ici...

Click in that area and authorize the display of windows from GESTIM.

2) Change your security parameters in the Internet Options of your browser.
