TYPE OF FILE

MapInfo Interchange Format (.dat, .id, .map, .tab) or Shapefile (.shp, .shx, .dbf, .prj)

Notice :

MapInfo files may not display certain date fields. To correct the problem, you must change the date format of your computer to : (yyyy/MM/dd) in the Regional Parameters of the Control Panel of your computer. You must then reimport your data.

USER AGREEMENT FOR DIGITAL DATA

This document is a legal Agreement between the User of the digital data and the Government of Quebec. By opening the files delivered with this agreement, you are agreeing to be bound by the terms of this agreement.

- 1) The Government of Quebec is the owner of the proprietary rights in the digital data delivered with this agreement.
- 2) Extraction and preparation costs may be required to obtain the data without regard of the provisions of the section 1.
- 3) The data is provided on an " as is " basis and the Government of Quebec does not warrant the integrity, the whole, the accuracy or the perfection of the product. Also, the Quebec Government reserves the right to modify and/or update data without obligations to notify the user.
- 4) The Government of Quebec shall not be liable in respect of any claim, demand or action, irrespective of nature of the cause of the claim, demand or action alleging any loss, injury or damages, direct or indirect, which may result from the user's use or possession of data.
- 5) The user may sell, lease and distribute the digital data contained on this CD in the form of new representations, derived works and products. The User shall not sell, lease and distribute the digital data contained on this CD in its unmodified form. He shall reference the source of information, included this agreement, and notify the new user that he is a User in regard of this agreement.
- 6) This agreement does not restrict the Government of Quebec in any way to provide to other parties the same data or different data.
- 7) This product should not be considered as the official mining titles map. This product contains raw data used to create the official mining titles map. The data provided was created for a nominal map scale of 1 :50 000. Therefore, any perceived error between two elements at a larger scale should not be considered a topological error.

The official mining titles map, deposited at the office of the registrar, can be consulted and downloaded at the following address :
