## I N T R O D U C T I O N

---

Depuis 1953, des travaux de recherche sur la biologie du Saumon de l'Atlantique ont été poursuivis par la Station de Biologie marine de Grande Rivière. En 1958, nous avons collaboré à ces travaux et c'est à partir de cette date que nous avons commencé à préparer une liste aussi complète que possible des travaux scientifiques concernant la biologie générale de cette espèce.

Nous présentons ici cette liste en espérant qu'elle sera utile à tous les chercheurs des différents pays où le Saumon présente encore un certain intérêt dans l'économie des pêches tant sportives que commerciales.

Pour réaliser ce travail, nous avons consulté les grands ouvrages suivants:

- Arctic Bibliography, volumes 1-7, 1953-1957.
- Biological Abstracts, volumes 1-35, 1926-1960.
- Bibliography of fishes, 3 volumes, 1916-1917.
- Bibliographia Oceanographica, volumes 1-23, 1928-1950.
- Bulletin signalétique, volumes 14-21, 1953-1960.
- Current bibliography for aquatic Sciences and Fisheries, volumes 1-3, 1957-1960.
- Journal du Conseil. Current bibliography, volumes 1-24, 1926-1960.
- Zoological Record. Pisces, volumes 1-94, 1864-1957.

Nous avons dû faire une sélection dans le choix des articles de certains périodiques (Salmon and Trout Magazine, Atlantic Salmon Journal), pour ne conserver que ceux qui avaient, à notre avis, une véritable valeur scientifique.

Il y aurait certes plusieurs additions à faire en relevant la littérature scientifique des pays scandinaves et de l'Union Soviétique mais nous croyons que la grande majorité des travaux scientifiques publiés en Amérique du Nord et en Europe Occidentale sont contenus dans cette liste. Sauf pour quelques références, nous nous sommes arrêté à l'année 1961 pour préparer cette liste.

Nous tenons à remercier tout particulièrement MM. Robert La-gueux et Léon Tremblay pour avoir mis à notre disposition leurs fiches bibliographiques personnelles.

## ANONYME

1910. Notes on the marking of Salmonidae; and results so far obtained from the Board's experiments. Board under the Salmon and Freshwater of Agriculture and Fisheries. (London) Annual Report of Proceedings Fisheries Acts, etc. for the year 1909, pp. xviii-xxxii.
1920. Salmon and artificial cultivation. *Salm. Trout Mag.*, 23:12-24.
